

Search Minerals announces non-brokered private placement

VANCOUVER, Sept. 14, 2012 /CNW/ - Search Minerals Inc. ("Search" or the "Company") (TSXV: SMY) is pleased to announce a non-brokered private placement financing of up to 1,400,000 flow-through units (the "FT Units") at a price of \$0.18 per FT Unit for gross proceeds of up to \$252,000.

Each FT Unit is comprised of one flow-through common share of the Company and one common share purchase warrant of the Company. Each warrant shall be exercisable into one additional non-flow through common share of the Company for a period of 18 months from closing of the private placement at an exercise price of \$0.20.

The gross proceeds from the sale of FT Units will be used to fund a drill program of the Company at its heavy rare earth element prospect at Pesky Hill, and for working capital and general corporate purposes.

The Company may pay a cash finder's fee to certain finders of up to 6% of the aggregate gross proceeds of the private placement. All securities issued pursuant to the private placement will be subject to a four month hold period from the date of issuance. Completion of the private placement is subject to TSX Venture Exchange approval.

Neither the TSX Venture Exchange nor its Regulation Services Provider (as that term is defined in the policies of the TSX Venture Exchange) accepts responsibility of the adequacy or accuracy of this release.

About Search Minerals

Search Minerals Inc. (TSXV:SMY) is a TSX Venture Exchange listed company, headquartered in Vancouver, B.C. Search is the discoverer of the Port Hope Simpson REE District, a highly prospective light and heavy REE belt located in southeast Labrador where the company controls a dominant land position in a belt 135km long and up to 12km wide. In addition, Search has a number of other mineral prospects in its portfolio located in Newfoundland and Labrador, including a number of claims in the Strange Lake Complex, where Quest Rare Minerals has an earn-in agreement with the Company; and at the Red Wine Complex, where Great Western Minerals Group has a Joint Venture with the Company.

Furthermore, Search Minerals is the owner of patents relating to the Starved Acid Leaching Technology ("SALT"), a process with the potential to economically recover nickel and cobalt from known deposits currently considered sub economic.

Search Minerals is led by a management team and Board of Directors with a proven track record in the mining industry. The Company has experienced geological and metallurgical teams led by Dr. Randy Miller and Dr. David Dreisinger respectively.
