

Search Minerals Closes Second and Final Tranche of Non-Brokered Financing

/NOT FOR DISTRIBUTION TO UNITED STATES NEWS WIRE SERVICES OR FOR DISSEMINATION IN THE UNITED STATES/

VANCOUVER, Aug. 22, 2012 /CNW/ - Search Minerals Inc. ("Search" or the "Company") (TSXV: SMY) is pleased to announce that it has closed the second and final tranche of its non-brokered private placement announced on May 29, 2012 and July 12, 2012. On closing, the Company issued 532,000 units (the "Units") at a price of \$0.20 per Unit for gross proceeds of \$106,400. Each Unit consists of one common share and one common share purchase warrant. Each warrant will entitle the holder to acquire an additional common share of Search until August 22, 2014 at a price of \$0.20 per share. The Company closed the private placement on the same terms as it originally announced on May 29, 2012, other than the term and exercise price of the warrants. The Company extended the term of the warrants from 12 months to 24 months and reduced the exercise price of the warrants from \$0.30 to \$0.20.

All securities issued pursuant to the second and final tranche are subject to a hold period expiring on December 22, 2012. No finders fees or commissions are payable in connection with financing.

Neither the TSX Venture Exchange nor its Regulation Services Provider (as that term is defined in the policies of the TSX Venture Exchange) accepts responsibility of the adequacy or accuracy of this release.

About Search:

Search Minerals Inc. (TSXV:SMY) is a TSX Venture Exchange listed company, headquartered in Vancouver, B.C. Search is the discoverer of the Port Hope Simpson REE District, a highly prospective light and heavy REE belt located in southeast Labrador where the company controls a dominant land position in a belt 135km long and up to 12km wide. In addition, Search has a number of other mineral prospects in its portfolio located in Newfoundland and Labrador, including a number of claims in the Strange Lake Complex, where Quest Rare Minerals has an earn-in agreement with the Company; and at the Red Wine Complex, where Great Western Minerals Group has a Joint Venture with the Company.

Furthermore, Search Minerals is the owner of the Starved Acid Leaching Technology (patents pending) ("SALT"), a process with the potential to economically recover nickel and cobalt from known deposits currently considered sub economic.

Search Minerals is led by a management team and Board of Directors with a proven track record in the mining industry. The Company has experienced geological and metallurgical teams led by Dr. Randy Miller and Dr. David Dreisinger respectively.

All material information on the Company may be found on its website at www.searchminerals.ca and on SEDAR at www.sedar.com.

Cautionary Statement:

This news release contains forward-looking statements that are not historical facts. Forward-looking statements involve risks, uncertainties and other factors that could cause actual results, performance, prospects, and opportunities to differ materially from those expressed or implied by such forward-looking statements. Factors that could cause actual results to differ materially from these forward-looking statements include those risks set out in Search's public documents filed on SEDAR at www.sedar.com. Although Search believes that the assumptions and factors used in preparing the forward-looking statements are reasonable, undue reliance should not be placed on these statements, which only apply as of the date of this news release, and no assurance can be given that such events will occur in the disclosed time frames or at all. Except where required by law, Search disclaims any intention or obligation to update or revise any forward-looking statement, whether as a result of new information, future events or otherwise.
